Wiki for SAP NetWeaver® Portal

Optimize Collaboration with a Corporate Wiki

Across the corporation or in specific departments, information in modern organisations has to be transparent, comprehensively documented and quickly accessible. Wikis allow each and every employee to exchange information easily and quickly. Without training overhead, all users will embrace this next-generation solution for optimum efficiency.

DON'T DELAY – START YOUR CORPORATE WIKI IN SAP'S NETWEAVER® PORTAL TODAY!

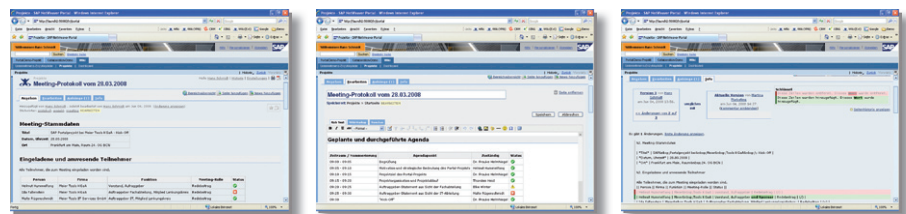

Do you want to create a corporate encyclopedia to leverage knowledge management? Do you need a user-friendly tool for quality management documentation? Do your employees demand a database to better share knowledge about products? Do you need to maintain product documentation that's always up-to-date?

ACT NOW!

With a corporate wiki, you can address virtually any information requirement - often even within a single solution. The new „Business Package for Confluence Wiki“ seamlessly integrates with your SAP NetWeaver® Portal to create an essential component of your corporate information strategy. Whether all employees will use it or only specific teams, your corporation will benefit as a whole.

EASY IMPLEMENTATION: BUSINESS PACKAGE FOR CONFLUENCE WIKI

Many companies running SAP's NetWeaver® Portal have come to appreciate the advantages of add-ons which fully adapt to the portal environment. The SAP-certified „Business Package for Confluence Wiki“ offers all features for seamless integration, including a role-based permissioning concept, professional search, multi-language interface and much more.

Frequent Webinars!
Learn about benefits and use cases of wikis, especially for your company!

COLLABORATION – FAST AND EFFICIENT:

Implementing the „Business Package for Confluence Wiki“ in SAP NetWeaver® Portal is no more difficult than finding and editing information. Leverage this efficient quick win for your corporation.

BENEFIT FROM WIKI BEST PRACTICES

COLLABORATIVE PROJECT PLATFORM

Provide project and team members with information and documents for easy retrieval and editing. Enhance specifications, project plans and task lists with workflow support, alerting and approval features.

STRATEGIC MARKETING / COMPETITORS MONITORING

Develop marketing strategies and trace market research and competitors across time, for example before, during and after a product launch. Link all types of information for immediate access to relevant knowledge.

KNOWLEDGE DATABASE

Maintain unstructured and professional information, connect and aggregate it on a knowledge platform to document corporate processes, guidelines, recurring events, check lists, etc.

QUALITY MANAGEMENT / INCIDENT MANAGEMENT

Document incidents, acknowledged quality deficiencies and corresponding action scenarios.

Vera Schormann, Manager Knowledge Management Services, B. Braun Melsungen AG

» **Comprehensive exchange of knowledge between our employees is essential for our company.**

Using a wiki has been the right strategy for us, and the 'Business Package for Confluence Wiki' is the perfect solution with SAP NetWeaver® Portal!

Based on ATlassian's Enterprise Wiki „Confluence“
